Jeffrey Scott

On Behalf Of:

Committee:

Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

The Covid-19 pandemic proved beyond a shadow of a doubt that public health officials do not follow the science. They use "emergencies" to expand government power, which is really their goal. To the liberal, government is god. They want to grow their god to take more money from the people they claim to represent, so that they can give make-work jobs to their friends and family and enrich themselves with fat salaries, pensions, and platinum insurance plans for life. This is the rot and corruption that pervades our state and federal governments. Citizens with commonsense can see it quite plainly for what it is.

Regarding this bill I will say this, unelected officials should not be given any power to make health care decision for private individuals. All this bill does is give more power to bureaucrats and takes away the freedom of individual citizens. I thought you guys love the slogan "My body, my choice"? Make your recommendations. Put a germ-ridden mask on your face to stoke fear in the less informed. Jab yourself with an untested substance and harm your own body. But keep your hands off of mine and my family's. Pass this bill and we will do exactly what we did to SB 1599. Pass this bill and you will only further expose the god-complex from which our government operates and push more people in Oregon away from your liberal ideologies.

With All Due Respect,

JS
