

Submitter: John Kelly
On Behalf Of:
Committee: Joint Special Committee On Referendum Petition
2026-302
Measure, Appointment or
Topic: SB1599

We all signed a petition with a clear date. Unfortunately the feminist crooks that have cheated their way into power don't care what the people want. Seeing our road infrastructure intentionally left to rot for politicians to use the money for things like bike curbs, and bus only lanes filled with empty buses. Why would you all do this? Easy the private companies that make them kick money back. Everything you have done so far has been theft hidden behind intentional failure. We want you to cut your stupid pet projects, and retire so we can get people in there to do the actual job, not just pose, and pocket the money from every direction you can. You all created this situation intentionally wasting funds on useless projects like speed bumps on roads every 200ft while the road is in such bad shape you can't get up to the speed limit anyway. You all aren't even smart enough about transportation to know how weight distribution works. Your busses need about two more axels to not destroy the road surface, but how could you expect the people in charge of transportation to know better when they are the people who grew up playing with dolls, and going to school to become a secretary ??The real answer is a complete leadership change to people who are competent, and have formal work experience driving, and hundreds of hours being on the roadway. Unfortunately the people that have cheated to the top of these positions did so to look brave, and there was a lot of money to steal, but have become an unreasonable intentional failure at the position. Giving you crooks anymore money at this point is completely out of the question. I know you have all tried every toxic feminist trick to cheat this through, and all you have done is guarantee we get a new governor who will get rid of all of Tina, and Kate's worthless appointed minions. Until then the people of Oregon trusts you so little they are coming out in force to say no more waste, and we don't trust any of you enough to give you an extra dime to waste on another traffic making, business wrecking, road destroying, empty bus, and train set intentional failure. We need real audits of all of you involved in every phase of transportation, charges need to be filed, and people like you need to go to jail for what you have done with the blatant theft of funds on useless projects, and all the embezzlement. That's what the meeting should be about, not the insanity of giving you clowns more money to waste on useless pet projects that do everything, but fix the actual road, and make traffic flow better.
