

To the legislators in Salem,

I was one of the people on the ground talking to my community and neighbors while we were getting signatures. The response I had was that 1 out of 100 said no to signing the petition we submitted. We intentionally asked for the November ballot to have enough time to inform our state about the impacts of the tax. If you choose to vote against the people, you are intentionally taking away their voice. Please let the people speak and follow their wishes in this vote.

Please vote no on SB 1599
