Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

This bill contains provisions which could create a shocking overreach by Governmental & Corporate Entities, violating personal medical decision making, as we so recently witnessed during the last 5 years.

Such behavior, the combination of unchecked Corporate power & Governmental authority, led to all the abuses of the Covid Pandemic. We in Oregon are not willing to give our medical decision making over to Governmental Agencies nor to Corporate Medical Systems which rely upon ill health to generate their profits.

This bill requires taxpayers to fund functionally forced or coerced medical interventions, some of which are labeled as vaccines or biologics yet which are more accurately gene therapies or genetic vaccines. Such therapies are dangerous and still untested in a controlled environment, while data collection slights of hand are employed to obscure their actual risks, one example being the vaccinated being erroneously listed as "unvaccinated" for two weeks post injection.

Duplicitous behavior of this sort results in extremely skewed data and information being released to the public and to the Legislators writing bills such as this one.

Please vote no on this bill which, once again, attempts to place critical health decisions into the hands of frankly unaccountable authorities while stripping fundamental human rights from Oregonians.
