

Submitter:	Diane Orme
On Behalf Of:	Myself
Committee:	Senate Committee On Health Care
Measure, Appointment or Topic:	SB1598

Unelected public health officials should not be able to have the power to require/mandate various requirements for medical compliance without individual consent and to compel insurance companies, doctors, and tax-payer supported public health programs. I am a Senior; I never had the Covid shot nor have I had a flu shot in a long time. I rarely get sick with flu and made it through Covid unscathed. One size fits all is not the answer.
