Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

Although the description appears innocuous the words REQUIRES and PUBLIC HEALTH OFFICER tells me my individual, religious, and health liberties are at risk here. Who is this unelected official that is given such power to virtually create health mandates?

I know the West Coast Health Alliance has diverged from federal guidelines and is intent on maintaining the old, very lucrative vaccination schedules. The AAP, for instance, is very much sponsored by large pharmaceutical companies. IS THIS NOT ALL ABOUT THE PROFIT MOTIVE? How many vaccinations is enough?

The last several ugly years of health mandates brought job losses, injuries, economic loss, and yes, deaths from some of the "hot" lots that were carelessly manufactured. And some people died right after the shots. There are instances in my community. Is this something we can expect again: mandated vaccinations and arbitrary health rules?

I think the HHS has it right at last, leaving medical matters up to DOCTORS and PATIENTS where such things belong.
