Committee:

Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

Although the description of this bill is innocuous in appearance, the words **Require** and **PUBLIC HEALTH OFFICER** indicate to me, as does the text, that my personal, religious, and health liberty may be at stake here, as well as those of the population at large.

I know that the West Coast Alliance has rejected the current HHS schedule. Some of the organizations involved here, including the AAP have more than public health to consider. The AAP is very much supported by large pharmaceutical corporations. I believe the motive here is **PROFIT** above all.

I recall the health mandates of the past--how inaccurate the information was that given to the public, contradictory and often ludicrous at points. I saw some people react badly to the covid shots and I know a few that died in this community. The VAERS figures were shocking.

I think the HHS has it right, leaving health matters between **PATIENT AND DOCTOR** where they belong. Some people have medical conditions that preclude certain inoculations.

And some shots may be basically ineffective or useless, even detrimental. There is no one size fits all medicine.
