

Submitter: Kathleen Wilson

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB4030

Attention House Committee on Climate, Energy, and Environment. I give my Support for HB 4030 regarding exempting packaging for berries and meat, poultry, fish, and seafood from producer responsibility requirements for packaging, paper, and food serviceware. We have no idea how products are recycled and what they are recycled From! Our plastic products and cooking utensils have dangerous recycled products sold within certain products. Most don't have a recycled label on the product.

Take note of the following paragraph of information.

Packaging used for raw protein products is fundamentally different from other consumer packaging. It is

governed by stringent federal food safety laws and relies on FDA-approved materials specifically

designed to control pathogens, maintain shelf life, and protect consumer health.

These materials are

engineered first and foremost for food safety and contamination prevention. (We have too much plastic in this world, Americans have become Plastic People)
