Measure, Appointment or Topic:

SB1598

Government should never have a kind of control to be able to force any person to take any medication, vaccine, injection or intravenous concoction against their will. Individuals should always have the final say as to what goes in their body. Force in this context includes threats of unemployment or creating extra difficulty finding employment, disallowing access to any lodging, housing, food sellers, restaurants, schools, public buildings, and any/all facilities that are accessible to individuals in a free society. That this should have to be said at all is an horror indication of the level govt's sense of gross entitlement has become to every aspect of an individual's life, liberty and pursuit of happiness.
