

Submitter:

Haley Prater

On Behalf Of:

Committee:

Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

I am opposing bill SB1598 on behalf of the Prater family. First hand seeing the aftermath of my coworkers and family members who took the Co-vid vaccines in 2020, I believe everyone should have the freedom to choose what is being done to their bodies and impacting their health. The vaccines were not tested enough and we have witnessed recalls on vaccines and medication taken back then and unfortunately it has impacted their health health of my loved ones in negative ways. It is concerning to me that I would have to express that freedom should remain free regarding our own health. When power and decision-making is centralized and accountability is eliminated, parental choice, medical discretion, and informed choice are weakened. At the very least, doctors should be allowed to make decisions in the best interest of their patients and patients should be able to discern for themselves if this is something they want to do. As someone who has converted to natural fibers, eats only natural non GMO ingredients without apeel applied to the skin of my fruits and vegetables, I do not take any drugs, shots, or medications and I want to keep it that way! I am healthier than my peers. I rarely get sick and not for long. I have natural energy daily and no need for caffeine. Last time I went to the doctor I was told I should consider birth control. I do not need birth control as I am healthy and planning to have kids with my husband and have been told side effects and bad experiences from people in my community. Imagine if I didn't have the right to decline birth control for my body. In conclusion, I oppose!
