Committee:

Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

Every person is different. Moving the decision to vaccinate someone away from the person/doctor relationship to an unelected bureaucrat - is a cop-out. The unelected bureaucrat will not lose their job if someone dies. They won't care.

As an elected official, you are ultimately responsible for the choices that unelected officials make, and you should be held accountable. If someone dies because someone you hired in an agency ultimately injects and kills people, you should be held accountable, put on trial and put in prison if found guilty. Would your decision be different if you would be held accountable personally for deaths/injuries?

In addition, there are no accommodations for religious beliefs. This is in direct violation of the 1st Amendment.

If this bill is passed into law, it can be fought in court, but I have to wonder what is wrong with my elected officials who pass laws that are blatantly against the Constitution. Why would you pass a bill that breaks the law and force people to take the state to court? Our tax dollars are used to fund these lawsuits that the state legislature should not pass because it is against the Constitution. Anyone who votes for this bill should be fired.

Please oppose this bill.
