

Submitter: Lisa Frey

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: SB1598

This measure would further the disconnect between doctors and their patients doing the real research to decide what is appropriate for a patient. Grocery stores see tremendous profit from these loopholes and deceptive and misleading ads send consumers to seek treatments that may do further harm.

We know that "science" is always changing and SHOULD change as new information and testing is completed. Saying something is "settled" when viruses and infections are constantly changing is wrong.

Maintain medical freedom and informed consent for the safety and health of all Oregonians. The standard should be raised not lowered as we've all seen the massive profits from unnecessary treatments.
