Topic: SB1599

It's very disappointing that referendum petition 2026-302 got moved past Monday's hearing, as almost all testimony was opposed. Trying to subvert the will of the voting public seems to be the democrat's standard operating procedure. The referral signature drive that collected a record number of signatures in a record amount of time should tell you how much we are tired of this crap. There are NO reasons to move the vote date other than pure politics. Please stop spitting in the face of the voting public (if that's even possible, these days) and vote NO to the attempt to move the date of the vote.
