Attn: **Senate Committee On Health Care**

Re: **SB 1598**

I am writing to confirm my support for SB 1598. Vaccines save lives. Recommendations must be science-based and access should never be limited by cost. Nothing in this bill limits anyone's freedom or bodily autonomy; it ensures that Oregon will continue to commit to a fact-based, socially responsible approach to public health policy.

Vaccines save lives.

Thank you,

Tegan O'Brien

Eugene, OR
