

Submitter: Aubrey Raney-Avers

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB4060

My name is Aubrey Raney-Avers and I am writing in opposition of HB 4060. As discussed in the public hearing, reversing legislation that has been in place for more than two years is not the way to handle challenges businesses and schools are facing. Florescent bulbs are no longer sold in Oregon, and the two years that have elapsed is a reasonable time to enact a solution for future lighting, especially as they have been able to continue using their florescent supplies. I am sensitive to both the supply cost and labor cost that can be a challenge for schools and businesses, and I also don't think that kicking the can down the road is the solution for something this toxic and energy inefficient. Thank you for your time.
