

Submitter: Hope Harris

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB4046

The majority of people in Oregon passed legislation over 4 decades ago saying we do NOT want any form of nuclear energy in our state. Somehow there are companies who have partnered with Oregon State University to do development of more nuclear reactors. Now these companies want to use their money & power to pass legislation to change what the people of Oregon have already decided. This bill is funded & sponsored by them. How ridiculous to be in favor of doing a study of nuclear power for Oregon when the voters have already said no to it!! The bill is only going to study any positive effects of nuclear power? There are NONE!! The bill should include opposing views also if it is to be considered. This is BALANCED! The bill also should be funded by a neutral source to make it fair. In any case I must implore you to scrap this bill & any other future plans to bring more nuclear power to our world! We need to be investing in CLEAN GREEN energy!!! Nuclear power is too costly in every single way! Please save our planet & say NO to nuclear power forever!!
