SB1501

A simpler solution would be to reduce the overall business tax burden in Oregon to make operating in a state like Oregon more attractive and profitable. This channels more money through tax revenue (site specific, though it be) into state control.

Additionally, leagues like the NBA certainly have adequate resources for ownership and maintenance of the sites where they play. If Oregon wants to incentivize them to stay, then lower taxes and remove operational burdens. This is not something state government should be involved in.
