

Submitter: Tania Neubauer

On Behalf Of:

Committee: House Committee On Revenue

Measure, Appointment or Topic: HB4084

Stop subsidizing data centers! Close this loophole before you extend these tax breaks to blights on our state that are making power unaffordable and pushing us toward nuclear power in Oregon! Don't extend this subsidy with no care for the impacts on what makes this state livable! Look at our neighbor states on the West Coast - they are unaffordable and gentrified in the extreme. This bill will push a fast track toward senseless development that will have the same impacts on our Oregon way of life. We need to preserve the best soils in the world and rein in the breakneck push towards extreme need for power that is already pushing us toward climate change. No snow this winter - why is that? Spend your time working to save our climate and our nature and our farms rather than to fast track paving over this beautiful state. There's so many more worthwhile things you could do this session. Don't pass this bill.
