Measure, Appointment or Topic:

SB1538

I oppose this bill. We have immigration laws formed by our representatives that decide who we let join "us" in this country that fundamentally belongs to its citizens. To allow whomever happens to have gotten past that system an education at the expense of tax payers is an affront to the citizens of our state. Our schools exist to educate our own children, and children of those we have collectively allowed under law to join us. If our state chooses not to support federal immigration enforcement, the least we can do is to not interfere with it or oppose it. Let's spend tax dollars on our own kids and not try to accommodate people who are not supposed to be here. It's an unsustainable policy to do so.
