

Submitter: Beverly Ferguson

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: HB4088

As a woman and mother, I strongly favor HB4088, which protects individual's rights to make medical and reproductive care decisions without undue restrictions from the government. We have seen how placing restrictions on care has resulted in harmful outcomes for people seeking care, whether pregnancy-related, gender support or transitioning care, or other personal medical situations. I believe in the freedom of each person to choose the medications, procedures, surgeries, and other care in conjunction with trained medical professionals. Please pass 4088 and ensure our medical freedoms.
