

Submitter: Marion Malcolm

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: SB1596

To Members of the House Education Committee:

When we engage with an activity or an issue, that is when we learn. This is true of us as adults. It is even more the case with kids. That's why I strongly support SB 1596 and urge you to do likewise. This is the "Play-based Learning" bill that would go a long way toward making learning joyful in our schools once again. It allows the natural energy and curiosity possessed by children to lead them into learning and will make school a place where kids want to be.

I write as a former teacher and a community educator. Please support SB 1596.

Thank you for your attention.

Marion Malcolm
