

Submitter: Lauren Spector

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: HB4088

My name is Lauren D. Spector. I am a 79 year old woman, who supports HB4088. I am disabled person. I am not a number, I am a real person.

I do not believe that government has any rights to interfere with doctors and patients care, no matter who the patient is.

What goes on with a patient and their doctors is no one business except theirs.

I have seen what has happened when the government interferes. Before Roe Vs Wad. Back Street Abortions. I lost a friend due to a botched abortion. My other friend due to a botch abortion cannot have children. There were no medical care or hospitals to help people, who needed abortions.

I have friends today who children are LGBTQ. These children might not be able to get medical care, because who they are.

This is very scary. This reminds me of 1936 Germany, people were not allowed to get medical care or any care at all because of their religion or who they are.

Please pass HB4088A. Thank you.

Sincerely

Lauren D.Spector
