

Submitter: B Tobias
On Behalf Of: NO 35M TO HECC FOR PRIORITY FOLKS
Committee: House Committee On Labor and Workforce
Development
Measure, Appointment or Topic: SB1512

Several issues with this bill, which has kotek/dems written all over it. First off it gives \$35M to HECC who does not allow audits to allow public to see what they do with the money.

Second, it goes only to "priority populations", and we all know who that is. I have seen medical clinics hire these folks, so they can get the "grant" and it is scary to see them give out medical advise without any training certifications, etc. Most hard working Oregonians got that way through studying, education, and hard work, which so many today in this state would much prefer the taxpayer pad their pocketbooks for them, so they don't have to work a 40 hr week just to eat and pay for babysitters.

Providing "wrap around" support means they pay for transportation, childcare and housing related aid for these folks. Let them get a job just like we did.....why should our tax dollars benefit a few "priority" people, instead of that \$35Million helping a lot of hard working tax payers??

NO ON THIS BILL
