Measure, Appointment or Topic: SB1586

Dear Legislators,

In the current climate-- both politically and geophysically-- we absolutely cannot afford to trade farmland and water resources for more "industry." If we don't have food and water, we die. No exceptions.

I appreciate the -8 amendment that at least intends to make data centers and cryptocurrency ineligible projects. Data centers and cryptocurrency guzzle massive amounts of electricity and water that we cannot afford to lose.

I urge you to adopt the -8 amendment to minimize the harm if you can't stop it from passing. And I urge you to vote NO on the bill.

Sincerely,
Helena Birecki
