Measure, Appointment or Topic: SB1548

I strongly oppose the proposed limit on edible cannabis potency. The majority of adults who use cannabis edibles require more than 10mg to achieve the desired effect, meaning that this limit would increase the cost for consumers significantly, as well as impacting the environment through the amount of extra packaging needed; if this is passed, the amount of plastic needed for packaging would increase tenfold. This will cause many cannabis companies to quit selling products in Oregon entirely, kneecapping a vital industry.
