

Submitter: Amber Rose

On Behalf Of:

Committee: House Committee On Economic Development, Small Business, and Trade

Measure, Appointment or Topic: SB1548

This bill is ridiculous and will do nothing but harm both businesses and consumers. Cannabis packaging already has extensive safety measures and child protections in place. Individually wrapped edibles would be grossly wasteful and would drastically increase costs for both creators and consumers. It would have a terrible negative effect on our local economy. There is zero need for these proposed changes, these products are purchased and consumed legally by adults who are fully capable of understanding their own intake limits and self-regulating. Unless you think alcohol should also only be sold in individually packaged single shots, then the stupidity of this proposal should be obvious. As a voter I will be extremely angry if this passes.
