

Submitter: Alex Johnson

On Behalf Of:

Committee: House Committee On Economic Development, Small
Business, and Trade

Measure, Appointment or Topic: SB1548

SB 1548 would create an incredible amount of packaging waste and increase production cost of each affected product which would continue to burden an already beleaguered set of producers as well as increase costs to consumers. Dosing instructions are on the packaging, folks should be able to read those and make the appropriate decisions. We do not need individually wrapped 10mg edible cannabis products. Thank you!
