

Submitter: Ryan Hassan

On Behalf Of:

Committee: House Committee On Economic Development, Small
Business, and Trade

Measure, Appointment or Topic: SB1548

This is a commonsense bill that will reduce injury in children. As a pediatrician, I see children harmed from unintentional injuries like ingestion poisoning all of the time. I have colleagues who have seen children after they consumed an entire container of edibles. With this legislation, that kind of event will be much more unlikely.
