Business, and Trade

Measure, Appointment or Topic: SB1548

I work at a dispensary and this law is not going to help anything. It's just going to lead to tons of environmental waste by having to use more packaging because people are going to buy 10 individual packages of 10mg edibles to get the same amount as before and it's not going to make kids safer. Make the warning label need to be more prominent or something, don't just take the dosage down.
