

Submitter: Harriet Cooke  
On Behalf Of: future generations  
Committee: Senate Committee On Finance and Revenue  
Measure, Appointment or Topic: SB1586

The proposed incentives go far beyond “semiconductor research” to include resource-intensive (which is a major understatement) data centers. SB 1586 will not only give away tax revenue, it will give away water, electricity generation, and farmland resources as well.

I oppose SB 1586 for the reasons articulated by Willamette Riverkeeper, as well as many farmers in the Tualatin River watershed.

We should not be supporting industries that threaten the fragile ecological health of our planet especially with financial giveaways to corporate interests during this time of large revenue shortfalls in Oregon.

Please vote NO on SB 1586.
