

Submitter: Loren Nason

On Behalf Of:

Committee: House Committee On Economic Development, Small
Business, and Trade

Measure, Appointment or SB1548
Topic:

This bill will have large environmental impacts with the excess packaging. Having to individually package something that is 1/10th of the original product will lead to exponentially more plastic entering our landfills and destroying our environment. Larger bulk packages use much less packaging for the same amount of product and are more environmentally friendly.
