

Submitter: Matthieu Ravera

On Behalf Of:

Committee: House Committee On Economic Development, Small Business, and Trade

Measure, Appointment or Topic: SB1548

I oppose this bill for many reasons.

First, Packaging each 10mg edibles will not be environmentally friendly. Also, The costs of production will increase and will end up on the customers. Many people will choose to buy from the black market which will be cheaper with higher dosage. Other people will simply choose to stop buying and make their own edibles. Also, small and medium cannabis processors might have difficulties or even might not be able to absorb the cost of changing their production method, adding to the instability of the cannabis industry.

Moreover, as a parent, this bill will not increase my children's safety. Cannabis edibles bought from a dispensary already have child resistant packaging and must be stored away from kids, just like alcohol.

Wouldn't it be a complete nonsense to sell vodka only in tiny shot size containers?

As a former employee of a small cannabis company who lost their job because of the hardship of the industry and as a parent, registered voter and taxpayer, I ask you to Please Vote NO on SB 1548.

Thanks!
