Committee: Senate Committee On Finance and Revenue
Measure, Appointment or Topic: SB1586

As a constituent in Oregon and a tribal member - the State of Oregon Governor and Representatives have a trust responsibility to consult with Indian Tribes in Oregon before exploiting precious resources such as land and water including any other natural resources needed to support AI data centers. I would argue that any and all support from the Governor of Oregon for these AI data centers are in complete violation of tribal sovereignty and self-determination. The natural resources and water "needed" to support such centers are a complete waste of these dwindling resources, including fresh water sources. Not only is it a waste of natural resources but would end up costing Oregon taxpayers more money in electrical costs. This is outrageous on all levels and as a constituent I am sharing my voice that AI data centers must NOT move forward. I would further ask our representatives to completely restrict AI data centers in Oregon. NO to AI Data Centers in Oregon!!!
