Committee: House Committee On Economic Development, Small  
Business, and Trade

Measure, Appointment or Topic: SB1548

Greetings!

Lets be honest-100 mg packaging is not a real issue of any kind. However reducing it to 10 is a big issue for people like me. People with stage 4 cancer. Please I beg of you do not do this. It will do nothing but add costs to something I truly do need to reduce the barfing. I am on Social security through the compassionate care act so im barely surviving as it is. Please do not pass this short sighted bill designed to increase costs to people.
