Committee: House Committee On Health Care
Measure, Appointment or Topic: SB1598

I oppose this because it leads to vaccine mandates. I have interstitial cystitis. According to The IC network website mRNA covid vaccine causes covid cystitis it intensifies the condition causing extreme pain and damage to the bladder. From my understanding from other chronic illness groups for some of my other conditions similar reactions to the vaccine happens causing being knocked out of remission. For health reasons vaccines isn't a one size fits all program. Please reconsider pushing this onto Oregonians.
