

Dear Chair Prozanski, Vice Chair Thatcher, and Members of the Senate Judiciary Committee,

I spent 40 years as a physician, practicing obstetrics and gynecology. I am deeply concerned about government intrusion and meddling by uninvolved citizens, into private healthcare decisions. We need to support the privacy of healthcare for everyone. This includes reproductive healthcare, including abortion and contraception specifically, gender affirming care, and much more. This bill solidifies the important principle of privacy, which really should be everyone's right. Thank you for supporting it.

I urge your support of HB4088A.
