

Dear Chair Prozanski, Vice Chair Thatcher, and Members of the Senate Judiciary Committee,

I am Juliette Dunn from Oregon, writing in support of HB 4088.

I am an LGBTQ individual with LGBTQ loved ones, as well as someone who has strongly benefitted from reproductive health care. I am highly concerned given the number of attacks we've seen on our health care. Me and my loved ones have had our lives transformed by the health care options in our state, and seeing these get restricted would spell dire circumstances for people in the same situation in the future, as well as my loved ones who need continual care. We have the right to privacy and protection from our medical providers. Please ensure that we continue to be protected in Oregon from unscientific malicious attacks on our care.

Please support this bill.
