

Submitter: Anonymous RN  
On Behalf Of:  
Committee: House Committee On Rules  
Measure, Appointment or Topic: SB1570  
To the Senate Health Care Committee:

I am an RN who works in a hospital. Patients have the right to safety and privacy at all times and this includes psychological safety. I have witnessed the fear of a mother who when learning of her child's discharge, expressed her anxiety that officers might be waiting at her door to deport her and her family. Her child needs medications and access to care to prevent further complications, and it starts with privacy and safety while seeking care. The hospital needs to remain a healing environment where we can advocate for the rights of our patients and ensure they are not going to be in harm's way.

I believe this bill has the chance to be a safety measure to help protect our patients/families and continue to provide them the care they need without fear of deportation or actions against them.

Thank you for allowing me the opportunity to provide comment and look forward to support on this bill.
