

RE: Oregon's SB 1598

I am writing to ask you to please oppose SB 1598.

As a constituent, I am absolutely opposed. It is our birthright in the United States to be able to make our own informed medical decisions which should remain between each patient and their medical providers who know their unique medical history. No medicine has ever been one size fits all and giving sweeping authority to a single unelected official to decide what products/procedures insurers must cover, without any legislative oversight or public debate or accountability, is not what this democracy was founded on.

Oregon taxpayers deserve better; we cannot call ourselves the land of the free if we do not even have the most fundamental ability to choose what happens to our bodies, that would constitute authoritarianism.

Please do not let this happen. Please oppose SB 1598.
