

Submitter: Tyler Carpenter  
On Behalf Of: Kumba Hills Farms  
Committee: House Committee On Economic Development, Small  
Business, and Trade  
Measure, Appointment or Topic: SB1548

Good afternoon,

As a member of the cannabis community, lifelong oregon resident, board member of Southern Oregon Family Farms, I find this bill to be backwards motions. We are already some of the most heavily restricted industry's within the state. I understand the view of this bill is child safety. In response I would ask you this. When kids get into their parents alcohol or cigarettes or pharmaceuticals do you pass legislation that damages the company's. The answer is no. If a child resistant pop top is okay for Percocet I don't see why we should be restricted beyond the point we are. Lowering dosage and requiring single packaging will only cause more waste, increase cost and harm an already struggling industry. The oregon cannabis market is seeing lower and lower pricing across the board. Instead of working on solutions that will bring benefits to the state and the industry the state of oregon has chosen to all but openly fight against the inevitable expansion of this industry. I would like you think about this, what other legal state is implementing these kinds of guidelines? I beg you to make decisions to benefit our industry and in return oregon will see cannabis become a much larger and beneficial source of tax revenue and income for the state. Pass legislation that makes sense. Please don't add yet another weight to the sled while we are already loosing momentum.

Thank you for your time, I hope you vote in opposition of this bills.

Tyler Carpenter
