

Submitter: Margaret Frontella

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: HB4111

Please support HB-4111-A. I'm a concerned citizen and have strong ethical and moral empathy for how people are treated in this society. As a matter of basic decency, irrelevant information should not be required from people, which unfortunately gets used against them by nefarious individuals, companies and/or government agencies. No one should feel intimidated for making changes to their personal records. No one should feel fear to go into court and stand before others because of what their "status" may be. The question is self creates prejudices and biases!
