Business, and Trade

Measure, Appointment or Topic: SB1548

The most effective way to keep edibles out of kids hands is with better education. Educating bud-tenders & consumers about proper dosing & proper storage to keep edibles out of reach of children. Also educating children on what to do if they see "candy" they don't recognize & what logo/picture to look for that would identify it as THC and not for them.

This bill is not the way to keep edibles safe.
