

Submitter: T Oberg
On Behalf Of: LET US PRACTICE MEDICINE
Committee: House Committee On Rules
Measure, Appointment or Topic: SB1570

As medical personnel, we treat all people who need help, and as such, occasionally have to deal with convicts who are accompanied by police to protect us all from the convict escaping or hurting us. We occasionally are struck by patients who may be on drugs, etc, and there are many other situations where our safety is a concern. The last thing we need, is to have the state telling us where we can patients/ rooms, or be unable to identify if we are dealing with a potentially dangerous person. Authorities are not going to waste their time to come into a hospital to retrieve an upstanding citizen, but might come in to identify a dangerous person. We appreciate all the authorities do to help keep the public and hospital employees safe and we WANT NOTHING TO DO WITH THIS BILL.

It is nothing but pushing some beguiled person's unjust and twisted political ideology. Send this junk to China and use it there, but not in America!
