

Submitter: Emily Johnson

On Behalf Of:

Committee: Senate Committee On Finance and Revenue

Measure, Appointment or Topic: HB4134

I am a farmer, and it is incredibly clear to me through my work that the health of people and our environment is inextricably linked. Keeping nature healthy keeps people healthy. Projects funded by this legislation will help protect and clean drinking water, support wild pollinators and other native insects that are essential to our food and natural systems, and maintain species like bats that help control insect populations. These investments aren't just an investment in our environment; they're an investment in community health and food system resilience.

Please pass this legislation and invest in the future of our state.

Best,

Emily Johnson, Eugene
