

Submitter: Anne Ryland P.A.  
On Behalf Of:  
Committee: House Committee On Health Care  
Measure, Appointment or Topic: SB1598

As a medical provider in Oregon for 35 years and an Oregon resident for 44 I ask that this bill be rescinded and reviewed with improved proposals. Currently Oregon is NOT following CDC guidelines for immunizations and is openly defying them by following the AAP which is a private organization . AAP receives millions of dollars in funding from pharmaceutical companies. This is public record. Having reviewed the science behind the new recommendations for years..it is disconcerting that OHA is acting not as a public servant but a political party by openly departing from sound recommendations from the CDC regarding vaccines. Proposals regarding preventive health services should be reviewed by non partisan members and no medical authority consisting of one person should be making decisions for our citizens. Our state was ranked 8th WORST in the nation during the Covid pandemic because many of the decisions and mandates during this period were ordered by ONE individual. We all can look back at this time and realize how harmful many of these decisions were. It is imperative that health care decisions are left between a patient or their parent or guardian and their health care provider. The language which describes standing order "shall not" needs to be modified to "May not" to protect medical freedom.
