

Submitter: Dan Drayton

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB4145

Astronomy oppose this bill. This bill has become tainted from the house judiciary committee because the chairman coercing a vote from another member of the committee. This bill should've never passed the house because of this.

This bill will raise the permit fees, pricing out several low income, families, persons, single moms, and abuse victims, who are trying to defend themselves from their abuser. This also extends waiting periods, which is also a hindrance, for the same above reasons stated. This bill will never lower the crime rate. Has nothing to do with lowering the crime rate or suicide rate. People want to commit suicide they will always find a way. You cannot outlaw suicide.

Again this bill should've never been passed out of the house judiciary committee. The bill has become tainted and needs to be killed in your committee. Do the right thing and vote against this bill. Thank you.
