

Submitter: Gerald Hargis

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB4145

We do not need this bill to pass, as it would resolve the issue of guns killing people. Time has always shown that it is not the firearm behind the person, but the person using that firearm that kills the individual. Instead of limiting purchases for law-abiding citizens, we need to introduce programs designed to address the psychological issues that a person usually has before committing the crime. Also, for schools, appropriate on and after hour security needs to be enforced to prevent any possible shootings from occurring at all from happening at that location.
