

Submitter: Robert Reardon

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB4145

To the legislature I am writing to express my concern about what is happening with house bill 4145. I strictly oppose any implementation of this bill. As you well know this will serve to hamstring the Law Abiding Citizen and the general public which provides funding and support for all things government in the state of Oregon. What this will not do is cure any issues about illegal firearm possession by criminals gangs and people who disregard the law. It is an ill informed position to think that anyone who does not regard the law will care about capacities of magazines and or obtaining any kind of permission to purchase a firearm through the legal channels that we already have. There has been a background check forever Firearms are pretty controlled as it is and we do not need any more controls placed on law abiding citizens. Do not take away the rights of people who follow the rules and most of all have voted for the representatives that make up the Oregon state government and above all provide the funding that pays your salaries. There are many many other issues at stake that far surpass this issue, homelessness, drug use, business climate and other things more way more important than this. please reconsider vote NO thank you
