Senate Committee On Rules

Measure, Appointment or Topic:

HB4145

This bill will not solve crime, nor individuals with mental health issues. Current mental health is worrisome and is the cause of a lot of violent individuals yet all institutions have been eroded away and the eyes have only focused on firearms and of course making law after laws for people who dont follow them? Criminals? This only effects any sane gun owner and you should have at least one thought on how these bills only make money and don't solve anything.

Standard capacity magazines are somehow high capacity, suicides will not be prevented, criminals will keep committing crime and released a day later, taxes will grow so high that nobody can afford anything and homelessness will continue to skyrocket, this is unethical and terrible planning for everybody below you.

I strongly and firmly disagree with a lot of what has been put through, especially with recent events I strongly question the validity of any bill even put through anymore. The state has gone from the people having a voice and I doubt this shall be read and apologies for a semi-rant, but the lack of common sense coming from the house, bills, taxes going out of control over my life here is horrid and I hope things change to where we can all be happy. Quit straying from the people and listen to everybody and actually look at the base of the problem. 120% not the firearms.

Thanks for your time if you read this.
