

Opposition letter

Everything associated with measure 114 are HB 4145 thank you so much. Is it not compliance of the second amendment. you're required to have a permit to purchase but you can't you can get a firearm to use for the permit to purchase course which is firearm specific. The permits also don't allow for grandfathering of individuals that are continuously applying for their concealed, carry, which a lot of them are private security contractors, law Enforcement, military personnel and the emergency personnel that want to have firearms. A lot of individuals that need the firearm for their work like private armed security professionals, makes their job three times as hard to acquire a firearm that is required for the position, not to mention those individuals that are trying to advance

in their private security career. another point is that a lot of people in the emergency personnel field like paramedics, firefighters, even local law enforcement have to take time out of their day to go to the course which there was no allotted timeframe for along with pay for the course. It also intervenes, depending on the county and also takes away from the counties positional readiness for incidences. The primary issue is that we need to enforce with prejudice. The laws that are already in play instead of being relaxed on. They need to be a little bit harsher, instead of being so easygoing. This is my take on why i'm against measure 114 and a house bill 4154. Side knock, you are taking away from the lower class citizens. The individuals that are working paycheck to paycheck to make ends meet you're not helping them out You are crushing them.
